Privacy Policy

Effective Date: August 2, 2026
Last Updated: August 2, 2026

Privacy Policy

Thank you for using **Tasty Slides** ("the App").

This Privacy Policy explains how **Individual Entrepreneur BORIS BELIAEV** ("we", "our", or "us") collects, uses, stores, and protects information when you use the App.

We are committed to protecting your privacy and collecting only the information necessary to provide and improve our services.

By using the App, you agree to the practices described in this Privacy Policy.

1. Information We Collect

Tasty Slides does not require users to create an account and does not intentionally collect personally identifiable information such as your name, email address, phone number, or home address.

Depending on how you use the App, we may process the following information:

- Recipe requests entered by the user.
- Anonymous application usage analytics.
- Crash reports and diagnostic information.
- Push notification permission status.
- Subscription status provided by Apple.

Please do not include sensitive or personal information in recipe requests submitted through the App.

2. Recipe Requests

The App allows users to generate recipe carousels using artificial intelligence.

When you submit a recipe request, the text you enter is securely transmitted to our backend server for processing.

Recipe requests are used solely for generating recipe content and improving the functionality of the App.

3. Photos and Camera

The App allows you to:

- Select a background image from your photo library.
- Capture a new photo using your device's camera.

These images are processed entirely on your device.

Images selected or captured by users are **never uploaded to our servers**, **never transmitted to OpenAI**, and **never shared with third parties**.

Access to your camera or photo library is requested only after your permission has been granted by iOS.

4. Artificial Intelligence

Recipe generation is powered by OpenAI through our secure backend infrastructure.

Only the recipe request entered by the user is transmitted for AI processing.

The App does not transmit user-selected images or other locally stored media to OpenAI.

The generated response consists solely of recipe-related text, which is then used locally by the App to create recipe slides.

5. Analytics and Crash Reporting

To improve the stability, reliability, and performance of the App, we use the following services:

- Firebase Analytics
- Firebase Crashlytics

These services may collect anonymous technical information including, but not limited to:

- Device model
- Operating system version
- App version

- Language settings
- Crash logs
- Anonymous usage events

This information is used exclusively to improve the App and diagnose technical issues.

We do not use this information to personally identify users.

6. Push Notifications

The App may request permission to send push notifications.

Notifications are sent only if you explicitly grant permission.

You may disable notifications at any time through your device settings.

7. Subscriptions and Payments

Tasty Slides offers auto-renewable subscriptions through Apple's In-App Purchase system.

Available subscription plans may include:

- Weekly Subscription (including a 3-day free trial for eligible users)
- Monthly Subscription
- Six-Month Subscription

All payments are processed directly by Apple.

We do not collect, process, or store your payment card information or billing details.

Subscription management, renewals, and cancellations are handled entirely through your Apple ID account settings.

8. Data Storage

Recipe requests are processed through our secure backend hosted on DigitalOcean servers located in Amsterdam, Netherlands.

User-selected background images remain on the user's device unless the user chooses to share them independently.

Generated recipe slides and saved content are stored locally on the device unless otherwise

stated.

9. Third-Party Services

The App uses trusted third-party service providers, including:

- OpenAI
- Google Firebase Analytics
- Firebase Crashlytics
- Apple In-App Purchases
- Apple Push Notification Service (APNs)
- DigitalOcean

These providers may process information in accordance with their own privacy policies.

10. Children's Privacy

The App is intended for users aged **13 years or older**.

We do not knowingly collect personal information from children under the age of 13.

If you believe that a child has provided personal information through the App, please contact us and we will take appropriate steps.

11. Data Security

We implement reasonable technical and organizational measures designed to protect information processed through the App.

However, no method of electronic transmission or storage is completely secure, and we cannot guarantee absolute security.

12. Your Rights

Because Tasty Slides does not require user registration, we generally do not maintain personal user profiles.

You may:

- Stop using the App at any time.
- Delete locally stored content by removing the App from your device.
- Disable permissions such as Camera, Photos, or Notifications through your device settings.

If you have questions regarding information processed through the App, you may contact us using the information below.

13. International Data Transfers

Some of the third-party services used by the App may process information in countries other than your own.

Where applicable, we rely on those providers' security measures and legal safeguards for international data transfers.

14. Changes to This Privacy Policy

We may update this Privacy Policy from time to time.

If material changes are made, the updated version will be published with a revised "Last Updated" date.

Continued use of the App after changes become effective constitutes acceptance of the updated Privacy Policy.

15. Contact Information

If you have any questions regarding this Privacy Policy or the way information is handled, please contact:
